HSIANG-LING (MOLLY) TSENG hsiang-ling-tseng
La Jolla, California (858) 214-5496 hstseng@ucsd.edu

EDUCATION

***Master of Science in Business Analytics*, Rady School of Management** *Dec. 2026*
University of California, San Diego, CA

PROFESSIONAL EXPERIENCE

Data Analyst Intern*, *IDX Exchange *Jun. 2026 – Sep. 2026, Boise*

- Developed an automated Python ETL pipeline integrating property sales and mortgage rate data via APIs and time-series joins, with IQR-based anomaly detection to improve the reliability of market analytics
- Built 10+ interactive Tableau dashboards using geospatial and market trend analysis to identify regional pricing gaps and help stakeholders prioritize investment opportunities and refine acquisition strategies

Data Scientist,* *Foodmandu Co., Ltd (Capstone Project) *Mar. 2026 – Jun. 2026, La Jolla*

- Designed an end-to-end customer retention framework for a food delivery platform, engineering 20+ features from 4.3M+ orders across 250K+ users to support churn prediction, segmentation, and cohort-level LTV analysis
- Developed an XGBoost churn prediction model with rolling-window validation (0.83 AUC, 87% recall) and segmented users into 6 behavioral personas using PCA and K-Means to prioritize high-risk, high-value customers
- Partnered with Product and CRM teams to design 40+ personalized push-notification strategies using churn scores and predicted LTV, tailoring reactivation offers for 87K+ customers

Data Analyst*, *Big Data Co., Ltd *Jul. 2024 – Feb. 2025, Taipei*

- Extracted and cleaned 500K+ social media posts using Excel (Power Query) and SQL, standardizing data formats and removing duplicates to reduce data preparation time by ~50% for campaign performance and brand analysis
- Analyzed sentiment, Share of Voice, and influencer performance across 12+ Estée Lauder Companies beauty brands, helping teams optimize messaging, benchmark competitors, and refine influencer strategy

Audit Intern*, *KPMG *Jun. 2023 – Jul. 2023, Taipei*

- Conducted tax sampling, field audits, and workpaper preparation using Excel; reviewed transactions and internal controls to identify discrepancies, recommend process improvements, and support accurate audit conclusions
- Communicated with clients to clarify documentation requirements and resolve reporting inconsistencies, ensuring compliance with audit procedures and reducing financial risk exposure

PROJECTS

Next-Best-Offer Email Targeting* | *Pentathlon, Case Study *Mar. 2026, La Jolla*

- Benchmarked linear and tree-based models on AUC and expected profit to forecast customer response and campaign revenue across email channels to maximize marketing ROI
- Analyzed a 600K+ customer randomized test to match customers with the highest-value email, projecting 12.4% profit lift (~€388K per 5M emails) over a one-size-fits-all campaign

Marketing Campaign Uplift Modeling* | *Creative Gaming, Case Study *Jan. 2026, La Jolla*

- Improved incremental buyer targeting over traditional propensity models by developing an Uplift Model using XGBoost, Neural Network, Random Forest, and Logistic Regression, utilizing Qini curves to validate campaign lift
- Designed an A/B testing framework that projected a 15% profit lift by estimating sample sizes, testing hypotheses, and running offline simulations to reduce unnecessary spending

SPECIALIZED SKILLS

- ***Programming*:** Python(Pandas, NumPy, Matplotlib, Scikit-learn, Scipy, polars, Plotnine), SQL (PostgreSQL, MySQL, Snowflake), R, Keras, Git
- ***BI tools*:** Alteryx, Power BI, Tableau, Google Analytics, Excel
- ***Big Data***: Spark, PySpark, Hadoop, AWS (SageMaker, EC2, S3)
- ***Analytical Skills*:** Data visualization, Exploratory Data Analysis (EDA), Hypothesis Testing, Statistical Modeling, A/B Testing, Causal Inference, Customer Segmentation, Churn Prediction, CLV Analysis, RNN , Predictive Analysis(Regression Analysis, Classification, Clustering), Deep Learning(CNN, RNN, LSTM), Machine Learning (Supervised)
